Patience and Preservation

The Fund seeks to provide long-term growth of capital. We aim to generate attractive absolute and relative returns while fundamentally outperforming in times of weak markets. We invest patiently with a margin of safety to reduce the risk of permanent impairment of client assets and allow for long-term value creation.

Diligent Selection

Our disciplined approach focuses on owning a concentrated portfolio of durable, competitive, well-managed businesses at attractive prices. Our criteria include essential products and services, leadership in attractive markets, high barriers to entry, and effective capital allocation.

Tenured Experience

Our management team employs decades of industry experience to diligently evaluate opportunities, identify attractive growth investments, and assess risk.

BBH Select Series - Large Cap Fund

Fact Sheet (Class I) | July 2025

Price to Intrinsic Value is defined as the weighted average market value of the portfolio securities as a percentage of what BBH estimates to be the present value of the cash that the portfolio's businesses can generate and distribute to shareholders over the businesses' remaining life.

Turnover ratio is the rate of trading in a portfolio; higher values imply more frequent trading.

A margin of safety exists when we believe there is a significant discount to intrinsic value at the time of purchase. Intrinsic value is an estimate of the present value of the cash a business can generate over its remaining life.

The S&P 500 is an unmanaged weighted index of 500 stocks providing a broad indicator of stock price movements.

The composition of the index is materially different than the Fund's holdings. An index is not available for direct investment.

Risks

Investors in the Fund should be able to withstand short-term fluctuations in the equity markets in return for potentially higher returns over the long term. The value of portfolios changes every day and can be affected by changes in interest rates, general market conditions, and other political, social, and economic developments.

The Fund is 'non-diversified' and may assume large positions in a small number of issuers which can increase the potential for greater price fluctuation.

International investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

Other share classes may have different performance characteristics.

There can be no assurance the Fund will achieve its investment objectives.
