

BBH Select Series - Large Cap Fund

Fund Fact Sheet / 2Q 2022

PRINCIPAL STRATEGY AND OBJECTIVES¹

BBH Select Series – Large Cap (“the Fund”) seeks to provide investors with long-term growth of capital and to generate attractive returns over time. The Fund employs a disciplined investment approach focused on a concentrated portfolio of durable, well-managed, high-quality, competitively-advantaged businesses that we aim to own at attractive prices.

INVESTMENT CRITERIA

In our bottom-up investment process, the first priority is to identify eligible companies based on their qualitative attributes. We believe companies that meet our demanding investment criteria are better positioned to withstand periods of economic or financial market weakness and compound capital at attractive rates over time.

Business Attributes:

- Loyal customers
- Essential products and services you “Have to Have”
- Leadership in attractive markets
- Sustainable competitive advantages

Management Attributes:

- Strong operators with integrity
- Disciplined capital allocation

Financial Attributes:

- High returns on capital
- Strong balance sheet and cash flow

We evaluate environmental, social and governance (ESG²) factors as part of our investment research process to help us effectively assess the long-term sustainability and durability of our companies.

The Fund will generally hold investments in 25-35 companies with market capitalizations greater than \$5 billion that are headquartered in North America, as well as in certain global firms located in other developed regions. The targeted holding period is three to five years. Investments are typically sold if they appreciate to levels near BBH’s estimate of intrinsic value³.

Michael joined BBH in 2005 as an equity analyst

responsible for the technology and business services sectors. Prior to joining BBH, he held a similar research role at a brokerage firm. Michael earned a BSE from Princeton University and is a CFA Charterholder.

PRINCIPLES OF EQUITY INVESTING

Active Management

- Concentrated holdings; portfolio construction is sector and benchmark agnostic
- Primary due diligence incorporating deep fundamental analysis
- Investment team organized by sector; subject matter expertise is critical

Value-based

- Purchase businesses at a discount to their intrinsic values
- Use a valuation approach based on long-term forecasts
- Apply a trim/sell discipline that is valuation sensitive

Long-term Perspective

- Seek to invest in outstanding businesses that can grow their intrinsic value materially over time
- Willing to own companies for many years, through all parts of an economic cycle
- Ongoing company engagement deepens our insights over time

Durability and Opportunity

- Focus on cash-generative businesses that provide essential products and services, and can prosper in varying economic conditions
- Identify and analyze material ESG-related considerations
- Demand a dual-faceted margin of safety⁴ that seeks to mitigate both business risks and price risks

Discipline and Patience

- Adhere to strict investment criteria
- Seek to avoid low probability, high severity risks
- Exploit divergences between market prices and underlying intrinsic values

¹ There can be no assurance that the Fund will achieve its investment objectives.

² A less favorable ESG profile may not preclude the Adviser from investing in a credit, as the consideration of ESG factors is not more influential than the consideration of other investment criteria.

³ BBH’s estimate of the present value of the cash that a business can generate and distribute to shareholders over its remaining life.

⁴ With respect to equity investments, a margin of safety exists when we believe there is a significant discount to intrinsic value at the time of purchase.

RISKS

Investors in the Fund should be able to withstand short-term fluctuations in the equity markets and fixed income markets in return for potentially higher returns over the long term. The value of portfolios changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments.

The Fund is 'non-diversified' and may assume large positions in a small number of issuers which can increase the potential for greater price fluctuation.

International investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

Considering ESG factors as part of investment decisions may result in the fund forgoing otherwise attractive opportunities, which may result in lower performance when compared to funds that do not consider ESG factors.
