

BBH Income Fund

Fund Fact Sheet / 4Q 2022

PRINCIPAL STRATEGY AND OBJECTIVES¹

The BBH Income Fund (“the Fund”) seeks to provide maximum total return, consistent with preservation of capital and prudent investment management. The Fund aims to deliver excellent returns through market cycles for investors seeking broad exposure to the U.S. fixed income markets.

Our active management approach seeks to build taxable bond portfolios bottom-up, allowing valuation and security selection to drive our portfolio construction. Portfolios include durable, well-managed, appropriately structured credits² that can be thoroughly researched and understood.

INVESTMENT CRITERIA

Our independent research serves as the foundation of our bottom-up investment process. We also apply a proprietary quantitative framework to assess each security’s long-term return potential. We will hold reserves when available opportunities do not meet our credit and valuation criteria.

Investment opportunities must meet four essential criteria: durability, transparency, excellent management, and appropriate structure.

- **Durability:** Able to withstand a wide variety of economic conditions.
- **Transparency:** Can be thoroughly researched and understood.
- **Excellent Management:** Debt-conscious leaders focused on long-term viability and access to capital markets.
- **Appropriate Structure:** Appropriate leverage and available resources.

We evaluate environmental, social and governance (ESG³) factors as part of our investment research process to help us effectively assess the long-term sustainability and durability of our companies and credits.

PRINCIPLES OF FIXED INCOME INVESTING

- **Active Management:** We believe in a bottom up, value-based approach to active management.
- **Durability:** We only invest in securities we believe are built to withstand a variety of economic conditions.
- **High Conviction:** We work to balance ample diversification while ensuring meaningful concentration in our highest conviction ideas.
- **Long-term Perspective:** We underwrite our investments to perform through market cycles.
- **Discipline and Patience:** Many investment strategies are built around short-term expectations, momentum following and frequent trading. We believe that longer-term view of both companies and investments leads to stronger results and risk control over market cycles.

¹ There can be no assurance that the Fund will achieve its investment objectives.

² Obligations such as bonds, notes, loans, leases and other forms of indebtedness, except for Cash and Cash Equivalents, issued by obligors other than the U.S. Government and its agencies, totaled at the level of the ultimate obligor or guarantor of the Obligation.

³ A less favorable ESG profile may not preclude the Adviser from investing in a credit, as the consideration of ESG factors is not more influential than the consideration of other investment criteria.

Credit Quality letter ratings are provided by Standard and Poor's, Moody's and Fitch and are presented as the higher of the three ratings. When a security is not rated by Standard & Poor's, Moody's or Fitch, the highest credit ratings from DBRS and Kroll may be used. Absent a rating from these agencies, we may display Private Credit ratings, if permitted by the issuer, which could include ratings from Egan-Jones Ratings Co.

Issues with credit ratings of BBB or better are considered to be investment grade, with adequate capacity to meet financial commitments. Issues with credit ratings below BBB are considered speculative in nature and are vulnerable to the possibility of issuer failure or business interruption.

Effective duration is a measure of the portfolio's return sensitivity to changes in interest rates.

Weighted Average Life of securities excludes US Treasury futures positions.

Yield to Maturity is the rate of return the portfolio would achieve if all purchased bonds and derivatives were held to maturity, assuming all coupon and principal payments are received as scheduled and reinvested at the same yield to maturity. This figure is subject to change and is not meant to represent the yield earned by any particular security. Yield to Maturity is before fee and expenses.

RISKS

Investors in the Fund should be able to withstand short-term fluctuations in the fixed income markets in return for potentially higher returns over the long term. The value of portfolios changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments.

The value of some bonds including asset-backed and mortgage-backed securities may be sensitive to changes in prevailing interest rates that can cause a decline in their prices. Mortgage related securities are subject to prepayment and extension risk. The Fund also invests in derivative instruments, investments whose values depend on the performance of the underlying security, assets, interest rate, index or currency and entail potentially higher volatility and risk of loss compared to traditional stock or bond investments.

Investing in the bond market is subject to certain risks including market, interest-rate, issuer, maturity, call, credit, and inflation risk; investments may be worth more or less than the original cost when redeemed.

Foreign investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards. Prices of emerging market securities can be significantly more volatile than the prices of securities in developed countries, and currency risk and political risks are accentuated in emerging markets.

Considering ESG factors as part of investment decisions may result in the fund forgoing otherwise attractive opportunities, which may result in lower performance when compared to funds that do not consider ESG factors.

Below investment grade bonds, commonly known as junk bonds, are subject to a high level of credit and market risks and are considered speculative.

To the extent that the Fund experiences a large purchase or redemption on any business day, the Fund's performance may be adversely affected.

Bloomberg U.S. Aggregate Bond Index: covers the USD-denominated, investment-grade (rated Baa3 or above by Moody's), fixed-rate, and taxable areas of the bond market. This is the broadest measure of the taxable U.S. bond market, including most Treasury, agency, corporate, mortgage-backed, asset-backed, and international dollar-denominated issues, all with maturities of 1 year or more. The index is not available for direct investment.

The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 126 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The BBH Income Fund was rated against the 563 funds in the Intermediate Core-Plus Bond category for the Overall and three-year time periods ending 12/31/2022. The BBH Income Fund (Class I), received an Overall Morningstar Rating of 5 stars and a three-year rating of 5 stars.
