BBH Limited Duration Fund

Quarterly Fund Update | 2Q 2025

2Q Highlights

- The Fund outperformed its benchmark during the quarter, with sector and selection effects driving performance.
- Credit dynamics are generally healthy, with losses and delinquencies of business loans, consumer debt, and commercial real estate loans generally at manageable levels.
- There are idiosyncratic opportunities in distinct corners of the credit markets despite weak overall valuations, and we believe that selectivity regarding both valuations and durability are imperative for attaining favorable credit performance moving forward.

PERFORMANCE AS OF JUNE 30, 2025

Fund/benchmark	Total returns		Average annual total returns				
	3 mo.	YTD	1 yr.	3 yr.	5 yr.	10 yr.	Since inception
BBH Limited Duration Fund - Class I	1.57%	2.94%	6.49%	6.28%	3.96%	3.17%	3.89%
BBH Limited Duration Fund - Class N	1.46%	2.81%	6.41%	6.17%	3.88%	3.06%	3.75%
Bloomberg US 1-3 Year Treasury Bond Index	1.20%	2.84%	5.72%	3.43%	1.33%	1.59%	2.54%
Reference Benchmark	1.22%	2.56%	5.65%	4.70%	2.59%	2.37%	2.60%

Class I inception: 12/03/2002; Class I: Net/gross expense ratio (%) 0.27 / 0.27

Class N inception: 12/22/2000; Class N: Net/gross expense ratio (%): 0.35 / 0.49

Returns of less than one year are not annualized.

The Investment Advisor has contractually agreed to limit the Total Annual Fund Operating for the BBH Limited Duration Fund Class N to 0.35%, through March 1, 2026. The Expense Limitation Agreement may only be terminated during its term with approval of the Fund's Board of Trustees.

The Reference Benchmark is an unmanaged weighted index comprised as follows: 40% Bloomberg Short-Term Corporate Index; 40% Bloomberg US Aggregate ABS Index; and 20% Bloomberg US Treasury Bills Index. The inception date of the reference benchmark is 12/31/04. The indexes are not available for direct investment.

Performance data quoted represents past performance. Past performance does not guarantee future results and current performance may be lower or higher than the past performance data quoted. The investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than the original cost. For performance current to the most recent month-end please call 1-800-625-5759.

Market Environment

“In like a lion, out like a lamb” is an apt metaphor for capital markets in the second quarter. On April 2, 2025, the roar of Liberation Day tariffs rattled global markets. However, President Trump subsequently reduced the proposed tariff levels and markets rebounded strongly. A steady stream of notable headlines followed, including, but not limited to, the Moody’s U.S. downgrade, questions about the Federal Reserve’s independence, the One

Big Beautiful Bill (OBBA) Act and its impact to the U.S. fiscal deficit, and rising tensions in the Middle East. Despite the deluge of news, the quarter ended with economic and market data seemingly unconcerned with those headlines. Equities posted strong returns during the quarter, while credit performed well as spreads narrowed back to recent lows. Unemployment and inflation data remained steady, and business and consumer sentiment improved from Liberation Day lows. Market predictions shifted to a higher-for-longer Fed stance.

The second quarter showed why interest rate timing is a challenging undertaking. The yield curve both inverted further from zero to three years and steepened from three to 30 years as uncertainties regarding Fed rate cuts, inflation, and growth persisted. The next Fed decision is scheduled for July 30, 2025.

Investors predict the Fed will not cut rates then, with mixed opinions on whether the Fed cuts rates at all during the third quarter.

Fixed income indexes enjoyed positive total and excess returns during the quarter. Riskier segments of the market outperformed higher-quality indexes as credit spreads narrowed. The Bloomberg Aggregate Index returned 1.2%, while the JPM Leveraged Loan Index returned 2.4% and the Bloomberg High Yield Index returned 3.5%.

Credit issuance was mixed during the quarter despite a lull of deals during the depths of market volatility in April. Investment-grade corporate bond issuance matched last year's pace, while private label commercial mortgage-backed securities (CMBS) volumes are up 61% year over year. Issuance in several sectors was lower than their record-setting paces of 2024, yet volumes did not crater, and high-quality issuers can continue to access the markets. Volumes of nontraditional asset-backed securities (ABS), high-yield corporate bonds, and loans were down 9%, 15%, and 37%, respectively, year over year.

Credit dynamics are generally healthy, with losses and delinquencies of business loans, consumer debt, and commercial real estate loans generally at manageable levels. Businesses have weathered recent uncertainties well. Default rates are lower across the high yield market, although the default rate on loans continues to be well above those for bonds. Delinquencies and charge-off rates of business loans at commercial banks have stabilized, and non-accrual rates of loans held by business development companies (BDCs) crept higher yet remain at manageable levels.

Delinquency rates and charge-offs on consumer loans held at commercial banks increased, yet not to levels that raise concerns about systemic losses that might impact securitizations. While auto loans, bank credit cards, and mortgage delinquencies have only modestly increased, federal student loan payments resumed during the quarter, causing a spike in delinquency rates on student loans. It is questionable whether the resumption of student loan

¹ Excess return computed by BBH as total return less the return of the Bloomberg 3 Month T-Bill Bellwether Index, a proxy for the duration profile of floating-rate leveraged loans and CLO debt.

payments will have a spillover effect into other types of consumers' debt. Strong credit underwriting remains imperative to navigating debts backed by or tied to consumers.

Delinquency rates on commercial real estate varied by sectors and deal structures. Office delinquencies revealed a divergence by deal structure: Office loans in conduits continued to rise while single-asset, single-borrower (SASB) delinquencies moderated. Multifamily delinquencies increased to recent highs across deal structures. In retail, hotel, and industrial sectors, SASB and conduit delinquency rates converged at similar levels quarter over quarter. Delinquency rates and charge-offs of commercial real estate loans held at commercial banks remain subdued, indicating that market stress has not impacted banks' credit portfolios to date.

Valuations

With narrower spreads, strong fixed income fund flows, and mixed issuance, credit valuations weakened during the quarter. Investment-grade corporate bond "buys" decreased to 8% from 11%, to 27% from 38% for high yield, and to 43% from 45% for loans. Agency mortgage-backed securities (MBS) remain wholly unattractive, with no 15- or 30-year coupon cohort screening as a "buy." Away from credits in mainstream indexes, ABS index spreads narrowed, though performance varied by subsector. Higher-quality CMBS spreads narrowed as spreads of BBB-rated multifamily and mixed-use CMBS widened. Spreads on collateralized loan obligation (CLO) debt narrowed further from already tight levels.

As always, there are idiosyncratic opportunities in distinct corners of the credit markets. Investment-grade corporate bonds in interest rate-sensitive industries offer opportunities, and many bonds with short to intermediate durations screen favorably. The corporate loan market continues to offer opportunities across the

EXHIBIT II: OUTLOOK BY SECTOR

Sector	Outlook	Positioning
Reserves		
U.S. Treasuries/futures/reserves	Hold when attractive credits unavailable	Held to balance yield curve and duration exposures
Government-related	Unattractive valuations; better opportunities elsewhere	No positions in portfolios
Structured credit		
U.S. MBS	No purchase opportunities in 15- or 30-year pools	No positions in portfolios
RMBS	Continued credit, technical, and valuation concerns	No positions in portfolios
CMBS	Opportunities exist among high-quality properties seeking to refinance	Hold positions in SASB CMBS deals where we have transparency into collateral dynamics
ABS	Opportunities returning as many sectors' spreads reverted towards long term averages	Hold positions across diversified set of nontraditional segments
Corporate credit		
IG corporate bonds	Amount of attractively valued opportunities in benchmarks decreased further despite volatility	Holdings remain in some interest rate sensitive sectors and among certain security selection opportunities
Corporate loans	Opportunities shrink but remain balanced across issuer sizes and industries	Holdings are diversified and include credits issued by healthcare, airlines, and technology companies
HY corporate bonds	Spreads narrowed after Q2 spike, while distressed cohort remains low	Approaching new opportunities cautiously due to potential impact of tariff pressures
Other credit		
Municipal	Valuations of select municipals are attractive for inclusion in taxable portfolios	Holdings include transportation revenue bonds
Emerging markets	Concerns remain about creditor rights in most emerging market countries	No positions in portfolios

As of June 30, 2025. Portfolio holdings and characteristics are subject to change.

MBS = Mortgage-Backed Securities; RMBS = Residential Mortgage-Backed Securities; CMBS = Commercial Mortgage-Backed Securities; ABS = Asset-Backed Securities; IG = Investment Grade; HY = High Yield; SASB = Single Asset, Single Borrower; REIT = Real Estate Investment Trust

Source: BBH

spectrum of deal sizes. Most high-yield opportunities reside in selective and smaller issuers. Tariffs and fiscal policy uncertainty have also affected several high-yield industries' valuations and created opportunities. Spreads of several ABS subsectors and SASB CMBS property types have moved near their long-term averages.

We continue to avoid certain segments that we believe have enduring credit issues. Emerging market credit remains unappealing to us due to concerns over creditor rights in most countries and its impact on their durability. We find non-agency residential mortgage-backed securities (RMBS) plagued by erratic issuance trends, unattractive valuations, and weak fundamentals.

Performance

The Fund outperformed its benchmark during the quarter, with sector and selection effects driving performance. Interest rates contributed to absolute returns but detracted modestly from relative returns. Sector weightings within ABS and investment-grade corporate bonds impacted results favorably, as did selection in loans and ABS. Positions in healthcare loans and media entertainment loans contributed to selection results, while corporate bonds of high-yield electric utilities had a negative impact on selection results during the quarter.

Transaction Summary

We continued to find durable credits¹ offering attractive value even as valuations are broadly unattractive. The table below summarizes a few notable portfolio additions.

EXHIBIT III: PERFORMANCE ATTRIBUTION

	Average weight (%)	Contribution (basis points)		
	Portfolio	Rates	Sector	Selection

Characteristics

At the end of the quarter, the Fund's duration was 0.9 years, consistent with our objective of preserving capital. The Fund's yield to maturity was 5.3% and remained elevated vs. short-term bond market alternatives. The Fund's weight to corporate bonds, loans, and ABS marginally increased, while reserves decreased to 5% from 20%. The Fund held 5% in high-yield and nonrated credit instruments, similar to last quarter's level.

Concluding Remarks

If you could go back in time to last fall and show an investor this quarter's headlines, we suspect they would be shocked by the buoyancy of the stock market and rich valuations of credit. We believe that selectivity regarding both valuations and durability are imperative for attaining favorable credit performance moving forward. Complacency may be creeping into some segments of the market, but we remain steadfast in our approach. We maintain attention to factors that underlie an issuer's durability, such as underwriting standards, financial and operating flexibility, and prudent capital structures. Such an approach helps our clients' portfolios perform through unpredictable times.

Sincerely,

Andrew P. Hofer

LSEG Lipper Fund Awards

2024 Winner
United States

The **BBH Limited Duration Fund (BBBIX)** was named the Best Short Investment Grade Debt Funds over five years, for the period ending December 31, 2023. The fund was assessed against 90 funds in this category.

LSEG Lipper Fund Awards, ©2025 LSEG. All rights reserved.

Used under license.

The LSEG Lipper Fund Awards annually recognize funds and fund management firms for their consistently strong risk-adjusted three-, five- and 10-year performance relative to their peers based upon Lipper's quantitative, proprietary methodology. Other share classes may have different performance characteristics. Past performance is no guarantee of future results.

Opinions, forecasts, and discussions about investment strategies represent the author's views as of the date of this commentary and are subject to change without notice. References to specific securities, asset classes, and financial markets are for illustrative purposes only and are not intended to be, and should not be interpreted as recommendations.

Purchase and sale information provided should not be considered as a recommendation to purchase or sell a particular security and that there is no assurance, as of the date of publication, that the securities purchased remain in a fund's portfolio or that securities sold have not been repurchased. Nothing contained herein is intended as a recommendation to buy or sell any security, or to invest in any particular country, sector or asset class.

Traditional ABS include prime auto backed loans, credit cards and student loans (FFELP). Non-traditional ABS include ABS backed by other collateral types.

Effective duration is a measure of the portfolio's return sensitivity to changes in interest rates.

Weighted Average Life of securities excludes US Treasury futures positions.

Yield to Maturity is the rate of return the portfolio would achieve if all purchased bonds and derivatives were held to maturity, assuming all coupon and principal payments are received as scheduled and reinvested at the same yield to maturity. This figure is subject to change and is not meant to represent the yield earned by any particular security. Yield to Maturity is before fees and expenses.

The selection effect measures the investment manager's ability to select securities within a given segment relative to a benchmark.

The sector effect measures an investment manager's ability to effectively allocate their portfolio's assets to specific sectors relative to a benchmark.

The Class I shares commenced operations on December 3, 2002. Prior to December 3, 2002, performance reflects performance of the Class N shares adjusted to assume that all charges, expenses and fees were deducted. Performance prior to December 22, 2000 is that of the BBH Broad Market Fixed Income Portfolio adjusted to assume that all charges, expenses and fees of the Fund and the Portfolio which are presently in effect were deducted during such periods, as permitted by applicable SEC staff interpretations. The inception date of the BBH Broad Market Fixed Income Portfolio was July 20, 2000.

The Class N shares commenced operations on December 22, 2000. Performance prior to December 22, 2000 is that of the BBH Broad Market Fixed Income Portfolio adjusted to assume that all charges, expenses and fees of the Fund and the Portfolio which are presently in effect were deducted during such periods, as permitted by applicable SEC staff interpretations. The inception date of the BBH Broad Market Fixed Income Portfolio was July 20, 2000.

RISKS

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

Asset-Backed Securities ("ABS") are subject to risks due to defaults by the borrowers; failure of the issuer or servicer to perform; the variability in cash flows due to amortization or acceleration features; changes in interest rates which may influence the prepayments of the underlying securities; misrepresentation of asset quality, value or inadequate controls over disbursements and receipts; and the security being structured in ways that give certain investors less credit risk protection than others.

SASB lacks the diversification of a transaction backed by multiple loans since performance is concentrated in one commercial property. SASBs may be less liquid in the secondary market than loans backed by multiple commercial properties.

Foreign investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

The Fund also invests in derivative instruments, investments whose values depend on the performance of the underlying security, assets, interest rate, index or currency and entail potentially higher volatility and risk of loss compared to traditional stock or bond investments.

DEFINITIONS

The Bloomberg U.S. 1-3 Year Treasury Bond Index is an unmanaged index of fixed rate obligations of the U.S. Treasury with maturities ranging from 1-3 years.

Bloomberg Short-Term Corporate Index is an unmanaged index comprised of U.S. dollar denominated, investment grade, fixed rate, corporate securities with a remaining maturity from 1 day up to (but not including) 12 months and have at least \$250 million par amount outstanding.

Bloomberg US Aggregate ABS Index represents the ABS components of the Bloomberg U.S. Aggregate Index.

The Bloomberg US Aggregate Bond Index is a market-weighted index that tracks the daily price, coupon, pay-downs, and total return performance of fixed-rate, publicly placed, dollar-denominated, and non-convertible investment grade debt issues with at least \$300 million par amount outstanding and with at least one year to final maturity.

Bloomberg US Treasury Bills Index is an unmanaged index comprised publicly-issued U.S. Treasury bills with a remaining maturity from 1 day up to (but not including) 12 months. It excludes zero coupon strips. An index is not available for direct investment.

The composition of the index is materially different than the Fund's holdings. The Fund is actively managed and does not measure its performance success nor alter its construction in relation to any particular benchmark or index. An index is not available for direct investment.

"Bloomberg®" and the Bloomberg indexes are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the indexes (collectively, "Bloomberg") and have been licensed for use for certain purposes by Brown Brothers Harriman & Co (BBH). Bloomberg is not affiliated with BBH, and Bloomberg does not approve, endorse, review, or recommend the BBH Limited Duration Fund. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the fund.

You should consider the fund's investment objectives, risks, charges and expenses carefully before you invest. Information about these and other important subjects is in the fund's prospectus, which you should read carefully before investing.

Shares of the Fund are distributed by ALPS Distributors, Inc. and is located at 1290 Broadway, Suite 1000, Denver, CO 80203. Other products are offered by Brown Brothers Harriman.

Brown Brothers Harriman & Co. ("BBH"), a New York limited partnership, was founded in 1818 and provides investment advice to registered mutual funds through a separately identifiable department (the "SID"). The SID is registered with the U.S. Securities and Exchange Commission under the Investment Advisers Act of 1940.
