BBH Limited Duration Fund

Quarterly Fund Update | 2Q 2026

2Q Highlights

- The Fund had a positive return during the quarter primarily due to its defensive interest rate posture during a period of rising interest rates and favorable sector exposures.
- Credit valuations became less attractive during the quarter as credit spreads of every major market sector narrowed.
- Prolonged periods of low credit spreads and subdued volatility are not new to the fixed income markets. In these environments, we find that executing a selective, bottom-up selection process can help investors perform through the inevitable spread widening that will occur.

PERFORMANCE AS OF JUNE 30, 2026

Fund/benchmark	Total returns		Average annual total returns				
	3 mo.	YTD	1 yr.	3 yr.	5 yr.	10 yr.	Since inception
BBH Limited Duration Fund - Class I	1.12%	1.73%	4.37%	6.23%	4.15%	3.54%	3.91%
BBH Limited Duration Fund - Class N	1.10%	1.69%	4.39%	6.14%	4.07%	3.46%	3.77%
Bloomberg US 1-3 Year Treasury Bond Index	0.37%	0.64%	2.92%	4.38%	1.90%	1.75%	2.55%
Reference Benchmark	0.90%	1.54%	4.11%	5.15%	3.25%	2.62%	2.67%

Class I inception: 12/03/2002; Class I: Net/gross expense ratio (%) 0.27 / 0.27

Class N inception: 12/22/2000; Class N: Net/gross expense ratio (%): 0.35 / 0.49

Returns of less than one year are not annualized.

The Investment Advisor has contractually agreed to limit the Total Annual Fund Operating for the BBH Limited Duration Fund Class N to 0.35%, through March 1, 2027. The Expense Limitation Agreement may only be terminated during its term with approval of the Fund's Board of Trustees.

The Reference Benchmark is an unmanaged weighted index comprised as follows: 40% Bloomberg Short-Term Corporate Index; 40% Bloomberg US Aggregate ABS Index; and 20% Bloomberg US Treasury Bills Index. The inception date of the reference benchmark is 12/31/04. The indexes are not available for direct investment.

Upon the close of business 12/31/2025, Brown Brothers Harriman Credit Partners, LLC. (BBH Credit Partners), became the investment adviser to the Fund. Performance prior to that date is of BBH, the prior manager.

Performance data quoted represents past performance. Past performance does not guarantee future results and current performance may be lower or higher than the past performance data quoted. The investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than the original cost. For performance current to the most recent month-end please call 1-800-625-5759.

Market environment

Fixed income indices gained during second quarter 2026, as yields were cushioned by narrowing credit spreads against the impact of rising interest rates. Year to date, index returns have been paltry as interest rates rose and credit spreads hovered near historical lows. Credit excess returns over similar duration Treasuries were generally positive across sectors during the quarter and year to date.

Credit performance seems disconnected from the headlines. Inflationary concerns persist and have dissipated any prospective rate cut beliefs. U.S. consumer sentiment remains weak due to deepening concerns over affordability. The business uncertainties stemming from artificial intelligence (AI) disruption continue to loom. All of this is occurring as the Federal Reserve (the Fed) undergoes a change in leadership under new Chairman Kevin Warsh, who created task forces to focus on the Fed's approaches to communications, balance sheet policy, data quality and timeliness, productivity and jobs, and inflation frameworks.

The overall impact on credit market fundamentals has been limited. U.S. consumers appear challenged but resilient, with consumer debt losses and delinquency rates hovering at historically normal levels. The default rates of high-yield bonds and loans appear to have stabilized at manageable levels. Private credit default rates are declining, as are concerns over an imminent broad-based surge in default activity. All of this is also occurring in a market where strong companies can easily access debt capital.

Higher interest rates have commanded investors' attention, with fixed income funds experiencing inflows at a rapid pace. At the same time, credit issuance hit record-setting highs across several sectors and issuers were met with strong demand and low risk spreads. Volumes of investment grade corporate bonds increased 24%, high-yield bonds increased 21%, loans rose 25%, asset-backed securities (ABS) increased 18%, and nonagency commercial mortgage-backed securities (CMBS) increased 30% year over year. Even volumes of debt tied to private credit rose strongly. New issue private credit collateralized loan obligation (CLO) issuance increased 10% and business development company (BDC) debt volumes rose 63% from last year's pace. The theme of issuance tied to the buildout of AI infrastructure continued and intensified, with full-year forecasts for total credit issuance tied to financing AI ambitions rising 15% from the levels predicted at the start of the year.

Unless otherwise noted Excess Returns are the returns in the excess of duration matched Treasuries.

¹ Excess return computed by BBH as total return less the return of the Bloomberg 3 Month T-Bill Bellwether Index, a proxy for the duration profile of floating-rate leveraged loans and CLO debt. ICE = Intercontinental Exchange; CLO = Collateralized Loan Obligation; ABS = Asset-Backed Securities; CMBS = Commercial Mortgage-Backed Securities; MBS = Mortgage-Backed Securities; TIPS = Treasury Inflation Protected Securities; EM = Emerging Markets.

EXHIBIT II: OUTLOOK BY SECTOR

Sector	Outlook	Positioning
Reserves		
U.S. Treasuries/futures/reserves	Hold when attractive credits unavailable	Held to balance yield curve and duration exposures
Government-related	Unattractive valuations; better opportunities elsewhere	No positions in portfolios
Structured credit		
U.S. MBS	No purchase opportunities in 15- or 30-year pools	No positions in portfolios
RMBS	Continued credit, technical, and valuation concerns	No positions in portfolios
CMBS	Spreads remain attractive and opportunities exist across several property types of SASB deals	Hold issues of SASB and Freddie K securitizations with strong durability and transparency
ABS	Nontraditional spreads narrowed but remain above cyclical lows	Hold positions across diversified set of nontraditional segments, with recent purchases of data center ABS, triplet net lease ABS, broadly syndicated loan CLO, and personal consumer loan ABS
Corporate credit		
IG corporate bonds	Spreads narrowed back to historically low levels	Holdings remain in shorter duration bonds, companies in interest rate sensitive sectors, and idiosyncratic opportunities
Corporate loans	Opportunities remain in smaller issuers as default rates near longer-term averages	Newer purchases include loans of companies in the midstream energy, technology, healthcare, and manufacturing sectors
HY corporate bonds	Spreads of “BB” and “B” issues narrowed but opportunities remain	Identified newer opportunities in bonds of companies in the pharmaceutical, technology, and specialty lending industries
Other credit		
Municipal	Valuations of select municipals are attractive for inclusion in taxable portfolios	Minimal holdings in portfolios
Emerging markets	Concerns remain about creditor rights in most emerging market countries	No positions in portfolios

As of June 30, 2026. Portfolio holdings and characteristics are subject to change.

MBS = Mortgage-Backed Securities; RMBS = Residential Mortgage-Backed Securities; CMBS = Commercial Mortgage-Backed Securities; ABS = Asset-Backed Securities; IG = Investment Grade; HY = High Yield; SASB = Single Asset, Single Borrower; REIT = Real Estate Investment Trust
Source: BBH

Fundamentals indicate healthy performance of credits tied to borrowing by corporations, consumers, and commercial real estate operators. Default rates of high-yield corporate bonds and loans sit near their longer-term averages. Measures of private credit default activity fall in a range of 3% to 5%, higher than recent lows but consistent with long-term averages. Many types of consumer loans – including credit cards, autos, unsecured loans, and home improvement loans – report default and delinquency rates consistent with historical experience. Commercial real estate loan performance has steadied, with banks reporting minimal charge-offs and losses. Credit performance in single-asset single-borrower (SASB) deal structures has normalized, with delinquency rates stabilizing and losses remaining low.

Valuations

Credit valuations became less attractive during the quarter as credit spreads of every major market sector narrowed. The percentage of corporate bonds screening as potential “buy” opportunities for BBH decreased to 7% from 10% for investment grade and to 22% from 23% for high yield. In the loan market, however, the percentage of issues screening as a “buy” candidate increased to 62% from 55% last quarter. No coupon cohort of the agency

mortgage-backed securities (MBS) market screened as a “buy” candidate according to our Valuation Framework.¹ In the structured credit markets, spreads narrowed but remain above historical lows. Spreads of nontraditional ABS remain above cyclical lows, and SASB CMBS spreads remain closer to their historic medians. Debt spreads of broadly syndicated loan (BSL) CLOs narrowed and sat near cyclical lows. Spreads of debt tied to private credit narrowed during the quarter, while middle-market CLO and BDC bond spreads declined to levels closer to cyclical lows after rising briefly last quarter amid concerns tied to software company exposures and elevated redemption requests.

There are pockets of opportunities throughout the credit markets, though selectivity is imperative. Within the investment grade corporate bond market, over 40% of finance company and life insurance names meet our criteria for purchase, and opportunities remain in bonds maturing under five years. In the high-yield bond market, over half of the automotive and finance company industries screen as “buy” opportunities, while an abundance of loans to cable satellite, broadcasting, and technology companies screen favorably, to name a few. Opportunities emerged in several structured credit sectors, including ABS backed by data centers, personal consumer loans, triple net leases, fiber optic networks, SASB CMBS, and BSL CLOs.

Performance

The Fund had a positive return during the quarter primarily due to its defensive interest rate posture during a period of rising interest rates and favorable sector exposures. Exposures in holdings of ABS, investment grade corporate bonds, and corporate loans contributed to strong positive sector effects. On a relative basis, the portfolio’s duration profile contributed to results as it had less duration than its Index while interest rates rose. Selection results were also additive – specifically, positions in investment grade corporate bonds of life insurers, health insurers, and media entertainment companies. Holdings of data center ABS and personal consumer loan ABS also contributed to selection results. Loans to companies in the healthcare and pharmaceutical industries had a small but negative impact on selection results during the quarter.

EXHIBIT III: PERFORMANCE ATTRIBUTION

	Average weight (%)	Contribution (basis points)		
	Portfolio	Rates	Sector	Selection
Total portfolio	100.0%	65	47	7
Reserves	10.6%		0	0
Municipal	0.3%		0	0

Transaction summary

We continued to find durable credits² offering attractive value even as valuations reflect a growing belief that the U.S. economy is slowing. The table below summarizes a few notable portfolio additions.

¹ Our valuation framework is a purely quantitative screen for bonds that may offer excess return potential, primarily from mean reversion in spreads. When the potential excess return is above a specific hurdle rate, we label them “Buys” (others are “Holds” or “Sells”). These ratings are category names, not recommendations, as the valuation framework includes no credit research, a vital second step.

² Obligations such as bonds, notes, loans, leases, and other forms of indebtedness, except for cash and cash equivalents, issued by obligors other than the U.S. Government and its agencies, totaled at the level of the ultimate obligor or guarantor of the Obligation. Durable means the ability to withstand a wide variety of economic conditions.

EXHIBIT IV: TRANSACTION SUMMARY

Obligor	Coupon	Maturity	Yield (YTM)	Rating	Spread	Spread reference	Duration	Sector	Subsector

Source: BBH

Characteristics

At the end of the quarter, the Fund's duration was 0.9 years, consistent with the objective of preserving capital. The Fund's yield to maturity was 4.9% and remained elevated vs. short-term bond market alternatives. The Fund's holdings of reserves and loans increased slightly while holdings of ABS decreased in similar magnitude. The Fund's weight to high-yield and nonrated instruments remained around 3%.

Data reported as of June 30, 2026.

Basis point or "bp" is 1/100th of a percent (0.01% or 0.0001)

Credit Quality letter ratings are provided by Standard and Poor's, Moody's, and Fitch and are presented as the higher of the three ratings. Issues with credit ratings of BBB or better are considered to be investment grade, with adequate capacity to meet financial commitments. Issues with credit ratings below BBB are considered speculative in nature and are vulnerable to the possibility of issuer failure or business interruption.

Concluding remarks

Prolonged periods of low credit spreads and subdued volatility are not new to the fixed income markets. In these environments, we find that executing a selective, bottom-up selection process can help investors perform through the inevitable spread widening that will occur. Though no one knows when or why spreads will widen, we believe investing in durable credits with careful attention to valuations, appropriate debt structuring, transparency afforded to investors, and the caliber of management serve investors' long-term interests well regardless of the prevailing environment.

Sincerely,

Andrew P. Hofer

Brown Brothers Harriman has received a Lipper Group Award **LSEG Lipper Fund Award Winner U.S. 2026**, Best Fixed Income Asset Class (out of 91) in the Small Fund Family Group Over Three Years ending (November) 2025. This award for Fixed Income performance in the Small Fund Family Group is awarded to only one firm in the United States annually, highlighting fund companies that have excelled in delivering consistently strong risk-adjusted performance relative to their peers. Past performance is not indicative of future results.

LSEG Lipper Fund Awards, ©2026 LSEG. All rights reserved. Used under license.

The LSEG Lipper Fund Awards annually recognize funds and fund management firms for their consistently strong risk-adjusted three-, five- and 10-year performance relative to their peers based upon Lipper's quantitative, proprietary methodology. Other share classes may have different performance characteristics. Past performance is no guarantee of future results.

Opinions, forecasts, and discussions about investment strategies represent the author's views as of the date of this commentary and are subject to change without notice. References to specific securities, asset classes, and financial markets are for illustrative purposes only and are not intended to be, and should not be interpreted as recommendations.

Purchase and sale information provided should not be considered as a recommendation to purchase or sell a particular security and that there is no assurance, as of the date of publication, that the securities purchased remain in a fund's portfolio or that securities sold have not been repurchased. Nothing contained herein is intended as a recommendation to buy or sell any security, or to invest in any particular country, sector or asset class.

Traditional ABS include prime auto backed loans, credit cards and student loans (FFELP). Non-traditional ABS include ABS backed by other collateral types.

Effective duration is a measure of the portfolio's return sensitivity to changes in interest rates.

Weighted Average Life of securities excludes US Treasury futures positions.

Yield to Maturity is the rate of return the portfolio would achieve if all purchased bonds and derivatives were held to maturity, assuming all coupon and principal payments are received as scheduled and reinvested at the same yield to maturity. This figure is subject to change and is not meant to represent the yield earned by any particular security. Yield to Maturity is before fees and expenses.

The selection effect measures the investment manager's ability to select securities within a given segment relative to a benchmark.

The sector effect measures an investment manager's ability to effectively allocate their portfolio's assets to specific sectors relative to a benchmark.

The Class I shares commenced operations on December 3, 2002. Prior to December 3, 2002, performance reflects performance of the Class N shares adjusted to assume that all charges, expenses and fees were deducted. Performance prior to December 22, 2000 is that of the BBH Broad Market Fixed Income Portfolio adjusted to assume that all charges, expenses and fees of the Fund and the Portfolio which are presently in effect were deducted during such periods, as permitted by applicable SEC staff interpretations. The inception date of the BBH Broad Market Fixed Income Portfolio was July 20, 2000.

The Class N shares commenced operations on December 22, 2000. Performance prior to December 22, 2000 is that of the BBH Broad Market Fixed Income Portfolio adjusted to assume that all charges, expenses and fees of the Fund and the Portfolio which are presently in effect were deducted during such periods, as permitted by applicable SEC staff interpretations. The inception date of the BBH Broad Market Fixed Income Portfolio was July 20, 2000.

RISKS

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

Asset-Backed Securities (“ABS”) are subject to risks due to defaults by the borrowers; failure of the issuer or servicer to perform; the variability in cash flows due to amortization or acceleration features; changes in interest rates which may influence the prepayments of the underlying securities; misrepresentation of asset quality, value or inadequate controls over disbursements and receipts; and the security being structured in ways that give certain investors less credit risk protection than others.

SASB lacks the diversification of a transaction backed by multiple loans since performance is concentrated in one commercial property. SASBs may be less liquid in the secondary market than loans backed by multiple commercial properties.

Foreign investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

The Fund also invests in derivative instruments, investments whose values depend on the performance of the underlying security, assets, interest rate, index or currency and entail potentially higher volatility and risk of loss compared to traditional stock or bond investments.

DEFINITIONS

The Bloomberg U.S. 1-3 Year Treasury Bond Index is an unmanaged index of fixed rate obligations of the U.S. Treasury with maturities ranging from 1-3 years.

Bloomberg Short-Term Corporate Index is an unmanaged index comprised of U.S. dollar denominated, investment grade, fixed rate, corporate securities with a remaining maturity from 1 day up to (but not including) 12 months and have at least \$250 million par amount outstanding.

Bloomberg US Aggregate ABS Index represents the ABS components of the Bloomberg U.S. Aggregate Index.

The Bloomberg US Aggregate Bond Index is a market-weighted index that tracks the daily price, coupon, pay-downs, and total return performance of fixed-rate, publicly placed, dollar-denominated, and non-convertible investment grade debt issues with at least \$300 million par amount outstanding and with at least one year to final maturity.

Bloomberg US Treasury Bills Index is an unmanaged index comprised publicly-issued U.S. Treasury bills with a remaining maturity from 1 day up to (but not including) 12 months. It excludes zero coupon strips. An index is not available for direct investment.

The composition of the index is materially different than the Fund’s holdings. The Fund is actively managed and does not measure its performance success nor alter its construction in relation to any particular benchmark or index. An index is not available for direct investment.
