# BBH Limited Duration Fund

## Quarterly Fund Update | 4Q 2025

### 4Q Highlights

- The Fund outperformed its benchmark during the quarter, with sector and selection effects driving relative performance.
- Credit valuations remained broadly unattractive as credit spreads narrowed throughout the year; however, there are pockets of opportunity and credit issuance was generally strong.
- We are confident that credits owned in client portfolios meet our tests of durability while offering appropriate compensation for the risks assumed, and we believe our clients' portfolios are positioned to navigate opportunities that arise when valuations become more appealing.

### PERFORMANCE AS OF DECEMBER 31, 2025

Fund/benchmark	Total returns		Average annual total returns				
	3 mo.	YTD	1 yr.	3 yr.	5 yr.	10 yr.	Since inception
BBH Limited Duration Fund - Class I	1.18%	5.61%	5.61%	6.66%	4.00%	3.47%	3.92%
BBH Limited Duration Fund - Class N	1.16%	5.53%	5.53%	6.58%	3.94%	3.38%	3.78%
Bloomberg US 1-3 Year Treasury Bond Index	1.14%	5.17%	5.17%	4.50%	1.75%	1.83%	2.58%
Reference Benchmark	1.14%	5.16%	5.16%	5.36%	2.98%	2.60%	2.66%

Class I inception: 12/03/2002; Class I: Net/gross expense ratio (%) 0.27 / 0.27

Class N inception: 12/22/2000; Class N: Net/gross expense ratio (%): 0.35 / 0.49

Returns of less than one year are not annualized.

The Investment Advisor has contractually agreed to limit the Total Annual Fund Operating for the BBH Limited Duration Fund Class N to 0.35%, through March 1, 2026. The Expense Limitation Agreement may only be terminated during its term with approval of the Fund's Board of Trustees.

The Reference Benchmark is an unmanaged weighted index comprised as follows: 40% Bloomberg Short-Term Corporate Index; 40% Bloomberg US Aggregate ABS Index; and 20% Bloomberg US Treasury Bills Index. The inception date of the reference benchmark is 12/31/04. The indexes are not available for direct investment.

Upon the close of business 12/31/2025, Brown Brothers Harriman Credit Partners, LLC. (BBH Credit Partners), became the investment adviser to the Fund. Performance prior to that date is of BBH, the prior manager.

**Performance data quoted represents past performance. Past performance does not guarantee future results and current performance may be lower or higher than the past performance data quoted. The investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than the original cost. For performance current to the most recent month-end please call 1-800-625-5759.**

## Market environment

The Bloomberg U.S. Aggregate Index advanced 1.1% in fourth quarter 2025. The return was driven by lower short-term interest rates following Federal Reserve (the Fed) rate cuts, stable intermediate-term rates, and positive excess returns to credit across most sectors. These factors offset negative pressures from higher long-term rates and negative excess returns from long-maturity corporate bonds. Indexes of high-yield corporate bonds and loans each returned 1.3%, outperforming investment grade bonds after controlling for the effects of duration.

The Fed cut the federal funds target range twice by a total amount of 0.50% to 3.50% to 3.75%. The yield curve steepened during the quarter, with short-term rates moving lower while long-term rates increased. The Fed's next announcement date is January 28, 2026, and market estimates are for the Fed

to cut rates by a total of 0.50% over the course of 2026. Significant attention will be on the Fed in 2026 as Chairman Jerome Powell's term comes to an end in May, and there are questions about the degree to which political influences may impact monetary policy under a new Chairperson.

U.S. fiscal policies, trade policies, and geopolitical tensions made headlines during the year. The One Big Beautiful Bill Act (OBBBA) enacted tax cuts and spending reductions that impacted many policies, including the phase-outs of several clean energy tax breaks tied to electric vehicles and solar energy, changes to several federal student loan programs, and the elimination of some Affordable Care Act (ACA) subsidies. Congressional opposition to the expiration of these ACA subsidies resulted in a record-breaking shutdown of the U.S. government that ended with the passage of a bipartisan funding bill to reopen the government that did not resolve the extension of ACA subsidies. Tariff announcements produced significant market volatility during second quarter 2025. However, the market quickly absorbed the tariff changes even as any potential inflationary impact remains unknown. Escalations of geopolitical tensions in Ukraine, Gaza, Iran, and Venezuela commanded headlines throughout the year. Despite this barrage of newsworthy headlines, the Bloomberg U.S. Aggregate Index posted a full-year 2025 total return of 7.3% as interest rates declined and credit excess returns were positive across sectors.

## EXHIBIT I: FIXED INCOME INDEXES RETURNS

Unless otherwise noted Excess Returns are the returns in the excess of duration matched Treasuries.

<sup>1</sup> Excess return computed by BBH as total return less the return of the Bloomberg 3 Month T-Bill Bellwether Index, a proxy for the duration profile of floating-rate leveraged loans and CLO debt.

CLO = Collateralized Loan Obligation; ABS = Asset-Backed Securities; CMBS = Commercial Mortgage-Backed Securities; MBS = Mortgage-Backed Securities; TIPS = Treasury Inflation Protected Securities; EM = Emerging Markets; YE26 = year-end 2026

**EXHIBIT II: OUTLOOK BY SECTOR**

Sector	Outlook	Positioning
<b>Reserves</b>		
U.S. Treasuries/futures/reserves	Hold when attractive credits unavailable	Held to balance yield curve and duration exposures
Government-related	Unattractive valuations; better opportunities elsewhere	No positions in portfolios
<b>Structured credit</b>		
U.S. MBS	No purchase opportunities in 15- or 30-year pools	No positions in portfolios
RMBS	Continued credit, technical, and valuation concerns	No positions in portfolios
CMBS	Opportunities exist across several property types of SASB deals	Hold issues of SASB and Freddie K securitizations with strong durability and transparency
ABS	Nontraditional spreads widened and opportunities emerging in several subsectors	Hold positions across diversified set of nontraditional segments, with recent purchases of data center ABS, fiber ABS, personal consumer loan ABS, and broadly syndicated loan CLOs
<b>Corporate credit</b>		
IG corporate bonds	Spreads near historic lows, but some shorter-dated credits screen attractively	Holdings remain in shorter duration bonds, companies in interest rate sensitive sectors, and idiosyncratic opportunities
Corporate loans	Opportunities remain in smaller issuers as delinquencies rates stay low	Newer purchases include positions in loans of cable satellite, midstream energy, and media entertainment companies
HY corporate bonds	Spreads of "BB" and "B" issues near historical lows, but bonds of some smaller issuers screen favorably	Identified newer opportunities in bonds of finance companies, specialty REITs, and retailers
<b>Other credit</b>		
Municipal	Valuations of select municipals are attractive for inclusion in taxable portfolios	Holdings include transportation revenue bonds
Emerging markets	Concerns remain about creditor rights in most emerging market countries	No positions in portfolios

As of December 31, 2025. Portfolio holdings and characteristics are subject to change.

MBS = Mortgage-Backed Securities; RMBS = Residential Mortgage-Backed Securities; CMBS = Commercial Mortgage-Backed Securities; ABS = Asset-Backed Securities; IG = Investment Grade; HY = High Yield; SASB = Single Asset, Single Borrower; REIT = Real Estate Investment Trust

**Valuations**

Credit valuations remained broadly unattractive as credit spreads narrowed throughout the year. According to our valuation framework, there were few "buy" opportunities in mainstream indexes at quarter end.<sup>1</sup> Only 4% of investment grade corporate bonds, 15% of high-yield corporate bonds, and 0% of agency mortgage-backed securities (MBS) met our valuation purchase criteria. Collateralized loan obligation (CLO) debt spreads remained near their recent lows.

Notwithstanding, there are pockets of opportunity. In the investment grade corporate bond market, over 20% of shorter-maturity single-A bonds meet our criteria for purchase, over 30% of bonds issued by life insurers and finance companies screen favorably, and we have identified a few small idiosyncratic opportunities as well. Nearly half of corporate loans screen as "buy" candidates according to our valuation framework. In the structured credit markets, opportunities are emerging as valuations are improving in several subsectors. As nontraditional ABS spreads widened, spreads in certain subsectors have become appealing. Single-asset single-borrower (SASB)

<sup>1</sup> Our valuation framework is a purely quantitative screen for bonds that may offer excess return potential, primarily from mean reversion in spreads. When the potential excess return is above a specific hurdle rate, we label them "Buys" (others are "Holds" or "Sells"). These ratings are category names, not recommendations, as the valuation framework includes no credit research, a vital second step.

commercial mortgage-backed securities (CMBS) subsector spreads remained near their longer-term averages.

Credit issuance was generally strong, and markets have been open to issuers seeking to raise capital or refinance existing debt. Investment grade corporate bond volumes increased 4% year over year, ABS issuance was up 9%, and nonagency CMBS volumes surged 40% in 2025. High-yield bond volumes increased 9%, but loan volumes decreased 26% year over year.

One theme that permeated issuance across credit sectors was the increase in data center financing deals to fund the enormous demand for artificial intelligence (AI) infrastructure. The scale of issuance was notable: We estimate \$300 billion of investment grade corporate bond volumes were tied to such projects in 2025, representing 16% of high-grade corporate issuance. We estimate that data center and fiber ABS issuances represented 8% of ABS volumes in 2025 (up from 4% in 2024) while data center SASB CMBS deals were 8% of nonagency CMBS volumes (up from 2% in 2024). These financings included both established and first-time issuers, various deal structures, and different levels of protection from equity or asset pledges. We believe our time-tested approach to identifying durable credit investments in such deals should help our client portfolios navigate potential volatility tied to AI headlines or risk events.

The U.S. economy proved resilient amid an eventful political landscape. Consumer spending remains strong, although there are concerns over a K-shaped economy forming from the divergence between the spending of higher- and lower-income consumers. Consumer sentiment indexes sit at weak levels, with concerns about high prices and a softening labor market weighing on consumers. Credit performance of consumer-related debt and loans suggest a “normalization” of credit losses – above the stimulus – induced lows of the recent past and well below those experienced in recessions. The resumption of payments on federal student loans has not yet had a meaningful impact on delinquencies in payments on other types of consumer debt, such as credit cards or auto loans.

U.S. business performance remains strong. The quarter began with fears that private credit losses could accelerate and reduce the returns in this recently popular segment of credit markets. For example, there were two significant defaults that arose from instances of fraud: Tricolor and First Brands. While the impact of those defaults was relatively contained, larger-scale concerns emerged regarding potentially relaxed lending standards. Equity of business development companies (BDCs) traded at a 10% discount to their net asset value, rivaling lows last experienced in 2023. In the fixed income markets, credit spreads on BDC debt widened marginally, while spreads on CLO debt were relatively stable.

We have not observed evidence of a broad increase in default activity. The data reveals that default rates and loss statistics have normalized. The default rate of leveraged credits (high-yield bonds and syndicated loans) stood near its longer-term average at 3.1%. The default rate of loans held in private credit CLOs remains near the default rate of the broader leveraged credit market and near its longer-term average. BDC credit performance weakened slightly, but remained resilient, with nonaccrual rates ticking up only slightly while rates of realized losses and write-downs remained subdued. Charge-offs and delinquency rates of business loans held at U.S. commercial banks increased only slightly and remain well below levels experienced during recessions. We believe that any increase in private credit defaults, or losses, will drive dispersion in credit performance across issuers.

## Performance

The Fund outperformed its benchmark during the quarter, with sector and selection effects driving relative performance. The Fund’s defensive duration profile detracted modestly from relative performance as short-term rates fell. The Fund’s emphasis on ABS and investment grade corporate bonds contributed to performance. Positions in corporate loans, high-yield bonds of electric utilities, and high-grade bonds of banks contributed to results. Hold-

ings of high-yield bonds of specialty finance companies and specialty real estate investment trusts (REITs) had a negative impact on selection results during the quarter.

### Transaction summary

We continued to find durable credits<sup>2</sup> offering attractive value even as valuations reflect a growing belief that the U.S. economy is slowing. The table below summarizes a few notable portfolio additions.

### EXHIBIT III: PERFORMANCE ATTRIBUTION

	Average weight (%)	Contribution (basis points)

Data reported as of December 31, 2025.

Basis point or "bp" is 1/100th of a percent (0.01% or 0.0001)

## Characteristics

At the end of the quarter, the Fund's duration was 0.9 years, consistent with our objective of preserving capital. The Fund's yield to maturity was 4.6% and remained elevated vs. short-term bond market alternatives. The Fund's weight to reserves climbed to 14% from 12% last quarter and 5% at mid-year 2025 amid challenging valuations. The Fund's weight to high-yield and nonrated credit instruments declined to 4% from last quarter's level of 5%.

## Concluding remarks

Volatility is a feature of markets, and a built-in assumption and driver in our valuation process. We do not know what will cause the next bout of market volatility. Credit markets sit at a point of low to very low credit spreads in many major sectors. Periods of broadly unattractive credit valuations necessitate strong purchase and sale disciplines, a method of evaluating attractiveness of individual bonds, and careful selection accentuated by robust credit research. We are confident that credits owned in client portfolios meet our tests of durability while offering appropriate compensation for the risks assumed. Further, we believe our clients' portfolios are positioned to navigate opportunities that arise when valuations become more appealing.

Sincerely,

**Andrew P. Hofer**  
Fund Co-Manager

## LSEG Lipper Fund Awards

2024 Winner  
United States

The **BBH Limited Duration Fund (BBBIX)** was named the Best Short Investment Grade Debt Funds over five years, for the period ending December 31, 2023. The fund was assessed against 90 funds in this category.

LSEG Lipper Fund Awards, ©2026 LSEG. All rights reserved.

Used under license.

The LSEG Lipper Fund Awards annually recognize funds and fund management firms for their consistently strong risk-adjusted three-, five- and 10-year performance relative to their peers based upon Lipper's quantitative, proprietary methodology. Other share classes may have different performance characteristics. Past performance is no guarantee of future results.

Opinions, forecasts, and discussions about investment strategies represent the author's views as of the date of this commentary and are subject to change without notice. References to specific securities, asset classes, and financial markets are for illustrative purposes only and are not intended to be, and should not be interpreted as recommendations.

Purchase and sale information provided should not be considered as a recommendation to purchase or sell a particular security and that there is no assurance, as of the date of publication, that the securities purchased remain in a fund's portfolio or that securities sold have not been repurchased. Nothing contained herein is intended as a recommendation to buy or sell any security, or to invest in any particular country, sector or asset class.

Traditional ABS include prime auto backed loans, credit cards and student loans (FFELP). Non-traditional ABS include ABS backed by other collateral types.

Effective duration is a measure of the portfolio's return sensitivity to changes in interest rates.

Weighted Average Life of securities excludes US Treasury futures positions.

Yield to Maturity is the rate of return the portfolio would achieve if all purchased bonds and derivatives were held to maturity, assuming all coupon and principal payments are received as scheduled and reinvested at the same yield to maturity. This figure is subject to change and is not meant to represent the yield earned by any particular security. Yield to Maturity is before fees and expenses.

The selection effect measures the investment manager's ability to select securities within a given segment relative to a benchmark.

The sector effect measures an investment manager's ability to effectively allocate their portfolio's assets to specific sectors relative to a benchmark.

The Class I shares commenced operations on December 3, 2002. Prior to December 3, 2002, performance reflects performance of the Class N shares adjusted to assume that all charges, expenses and fees were deducted. Performance prior to December 22, 2000 is that of the BBH Broad Market Fixed Income Portfolio adjusted to assume that all charges, expenses and fees of the Fund and the Portfolio which are presently in effect were deducted during such periods, as permitted by applicable SEC staff interpretations. The inception date of the BBH Broad Market Fixed Income Portfolio was July 20, 2000.

The Class N shares commenced operations on December 22, 2000. Performance prior to December 22, 2000 is that of the BBH Broad Market Fixed Income Portfolio adjusted to assume that all charges, expenses and fees of the Fund and the Portfolio which are presently in effect were deducted during such periods, as permitted by applicable SEC staff interpretations. The inception date of the BBH Broad Market Fixed Income Portfolio was July 20, 2000.

## RISKS

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

Asset-Backed Securities (“ABS”) are subject to risks due to defaults by the borrowers; failure of the issuer or servicer to perform; the variability in cash flows due to amortization or acceleration features; changes in interest rates which may influence the prepayments of the underlying securities; misrepresentation of asset quality, value or inadequate controls over disbursements and receipts; and the security being structured in ways that give certain investors less credit risk protection than others.

SASB lacks the diversification of a transaction backed by multiple loans since performance is concentrated in one commercial property. SASBs may be less liquid in the secondary market than loans backed by multiple commercial properties.

Foreign investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

The Fund also invests in derivative instruments, investments whose values depend on the performance of the underlying security, assets, interest rate, index or currency and entail potentially higher volatility and risk of loss compared to traditional stock or bond investments.

## DEFINITIONS

The Bloomberg U.S. 1-3 Year Treasury Bond Index is an unmanaged index of fixed rate obligations of the U.S. Treasury with maturities ranging from 1-3 years.

Bloomberg Short-Term Corporate Index is an unmanaged index comprised of U.S. dollar denominated, investment grade, fixed rate, corporate securities with a remaining maturity from 1 day up to (but not including) 12 months and have at least \$250 million par amount outstanding.

Bloomberg US Aggregate ABS Index represents the ABS components of the Bloomberg U.S. Aggregate Index.

The Bloomberg US Aggregate Bond Index is a market-weighted index that tracks the daily price, coupon, pay-downs, and total return performance of fixed-rate, publicly placed, dollar-denominated, and non-convertible investment grade debt issues with at least \$300 million par amount outstanding and with at least one year to final maturity.

Bloomberg US Treasury Bills Index is an unmanaged index comprised publicly-issued U.S. Treasury bills with a remaining maturity from 1 day up to (but not including) 12 months. It excludes zero coupon strips. An index is not available for direct investment.

The composition of the index is materially different than the Fund’s holdings. The Fund is actively managed and does not measure its performance success nor alter its construction in relation to any particular benchmark or index. An index is not available for direct investment.

“Bloomberg®” and the Bloomberg indexes are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited (“BISL”), the administrator of the indexes (collectively, “Bloomberg”) and have been licensed for use for certain purposes by Brown Brothers Harriman & Co (BBH).
