

BBH Intermediate Municipal Bond Fund

Monthly Fund Update / April 2023

The BBH Intermediate Municipal Bond Fund Class I ("the Fund") returned -0.15% in April, and the Bloomberg U.S. 1-15 Year Muni Blend Index returned -0.28%.

Municipal rates rose across all tenors in April, and the municipal yield curve became further inverted for 5-10 year maturities. Though they did not meet during the month, the Federal Reserve (Fed) increased the federal funds rate by 0.25% to a range of 5.00%-5.25% on May 3rd. The Fed's next announcement is scheduled for June 14th.

Fund flows were mixed during April but ended the month slightly positive. Valuations within the municipal market also improved as risk spreads of municipal bonds rated "single-A" widened. Despite the challenges of spread widening, the Fund experienced favorable results from its holdings of prepaid gas, airport, and school district bonds.

As valuations improved, we sourced several attractive purchases during the month. These opportunities included delayed delivery bonds issued by the New Jersey State Economic Development Authority, hospital bonds issued by Baptist Health South Florida, and zero-coupon bonds of school districts in California and Oregon.

We remain focused on durable credits¹ that can control their own destinies and protect their market access. We believe this focus takes on increased importance as the Fed fights inflationary pressures and pushes the economy towards a possible recession. Owning these credits helps keep our clients' portfolios safe, and patience allows us to take advantage of opportunities generated by investor uncertainty.

¹ Obligations such as bonds, notes, loans, leases, and other forms of indebtedness, except for cash and cash equivalents, issued by obligors other than the U.S. Government and its agencies, totaled at the level of the ultimate obligor or guarantor of the Obligation. Durable means the ability to withstand a wide variety of economic conditions.

Overall Morningstar Rating™
As of April 30, 2023

Class I: 	Class N: 
--	--

Star ratings are based on risk-adjusted return. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year Morningstar Rating metrics. There are 270 funds in the Muni National Interm category Overall Rating as of 04/30/2023.

Past performance is not indicative of future results.

Performance

Yield to Maturity	102
Yield to Worst	3.95%

Holdings are subject to change. Totals may not sum due to rounding.

Credit Quality letter ratings are provided by Standard and Poor's, Moody's and Fitch and are presented as the higher of the three ratings. When a security is not rated by Standard & Poor's, Moody's or Fitch, the highest credit ratings from DBRS and Kroll may be used. Absent a rating from these agencies, we may display Private Credit ratings, if permitted by the issuer, which could include ratings from Egan-Jones Ratings Co. Credit rating exposure and composition are subject to change. Issues with credit ratings of BBB or better are considered to be investment grade, with adequate capacity to meet financial commitments. Issues with credit ratings below BBB are considered speculative in nature and are vulnerable to the possibility of issuer failure or business interruption.

Effective duration is a measure of the portfolio's return sensitivity to changes in interest rates.

Yield to Maturity is the rate of return the portfolio would achieve if all purchased bonds and derivatives were held to maturity, assuming all coupon and principal payments are received as scheduled and reinvested at the same yield to maturity. This figure is subject to change and is not meant to represent the yield earned by any particular security. Yield to Maturity is before fees and expenses.

Yield to Worst is the lowest yield an investor can expect when there is optionality on the bond (i.e., call or put, etc.). Yield to Maturity and Yield to Worst are before fees and expenses.

Out of 100 funds for the year ending 12/31/2022.

Ranking Entity is Evestnet | PMC Research.

Evestnet's systematic, proprietary, and multi-factor methodology for this awards program harnesses a variety of qualitative and quantitative criteria to identify award finalists from among the thousands of managers on the Evestnet platform. Evestnet reviews investment process and style, customer service, tax efficiency, performance, composite, and firm profile, among many other aspects of a manager's strategy and business. To be eligible for an award, managers must be broadly available on the Evestnet platform, have at least \$100 million in assets under management, and a three-year track record. Past performance is no guarantee of future results.

RISKS

There is no assurance that this investment objective will be achieved.

Diversification does not eliminate the risk of experiencing investment losses.

Investors in the Fund should be able to withstand short-term fluctuations in the fixed income markets in return for potentially higher returns over the long term. The value of portfolios changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments.

Investing in the bond market is subject to certain risks including market, interest-rate, issuer, credit, maturity, call and inflation risk; investments may be worth more or less than the original cost when redeemed.

Income from municipal bonds may be subject to state and local taxes and at times the alternative minimum tax.

The Fund also invests in derivative instruments, investments whose values depend on the performance of the underlying security, assets, interest rate, index or currency and entail potentially higher volatility and risk of loss compared to traditional stock or bond investments.

As the Fund's exposure in any one municipal revenue sector backed by revenues from similar types of projects increases, the Fund will also become more sensitive to adverse economic, business or political developments relevant to these projects.

Asset allocation decisions, particularly large redemptions, made by an investment adviser whose discretionary clients make up a large percentage of the Fund's shareholders may adversely impact remaining Fund shareholders.

The Bloomberg 1-15 Year Blend (1-17) Muni Index is a component of the Bloomberg Municipal Bond index, including bonds with maturity dates between one and 17 years. The Bloomberg Municipal Bond Index is considered representative of the broad market for investment grade, tax-exempt bonds with a maturity of at least one year. The index is not available for direct investment.

"Bloomberg®" and the Bloomberg 1-15 Year Blend (1-17) Muni Index are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by Brown Brothers Harriman & Co (BBH). Bloomberg is not affiliated with BBH, and Bloomberg does not approve, endorse, review, or recommend the BBH Intermediate Municipal Bond Fund. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the fund.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The BBH Intermediate Municipal Bond Fund was rated against the following numbers of Muni National Interim category funds over the following time periods: 270 funds in the last three years and 234 funds in the last five years. With respect to these Muni National Interim category funds, the BBH Intermediate Municipal Bond Fund (Class I & Class N), received an Overall Morningstar Rating of 3 stars and 3 stars, respectively. Class I three- and five years periods received ratings of 3 stars and 3 stars, respectively. Class N three- and five-year periods received ratings of 2 stars and 3 stars, respectively.
