

BBH Global Core Select Fund

Fund Fact Sheet / 4Q 2019

PHILOSOPHY

BBH Global Core Select (“the Fund”) aims to invest in established, cash-generative businesses that are leading providers of essential products and services with strong management teams. The Fund seeks to purchase the publicly-traded equity securities of such companies at a discount to our estimates of intrinsic value. Estimates of intrinsic value are based on proprietary analysis of prospective free cash flows and returns on capital. We apply a disciplined investment selection process focused on the following attributes:

INVESTMENT CRITERIA

Business Attributes:

- Essential products and services
- Loyal customers
- Leadership in an attractive market niche or industry
- Sustainable competitive advantages

Management Attributes:

- Strong operators with integrity
- Favorable capital allocation
- Meaningful share ownership

Financial Attributes:

- Strong balance sheet and free cash flow
- High returns on invested capital

The Fund will generally hold investments in 30-40 companies with market capitalizations greater than \$3 billion that are domiciled globally. The targeted holding period is three to five years. Investments are typically sold if they appreciate to levels near BBH’s estimate of intrinsic value.

PRINCIPLES OF EQUITY INVESTING

- **Investment Objective:** The Fund seeks to provide investors with long-term growth of capital and to generate attractive returns over time. The Fund does not attempt to mirror a benchmark or index.
- **Emphasis on capital preservation:** We view risk not as the price volatility of an investment, but instead as the likelihood of a permanent capital loss. To mitigate this risk, we apply our rigorous selection criteria and invest only in companies we believe have a significant margin of safety between the purchase price and our estimate of intrinsic value.
- **Ownership perspective:** We approach equity investing with the perspective of owning fractional shares of strong businesses for relatively long periods of time.
- **Long-term perspective:** Many investment strategies are built around short-term expectations, momentum following and frequent trading. We believe that a longer-term view of both companies and investments leads to stronger results and risk control over market cycles.
- **Minimize taxes and trading costs:** High portfolio turnover often generates taxable short-term gains and substantial trading costs, both of which can significantly erode the long-term compounding of returns. Our targeted holding period of 3-5 years helps us reduce these costs.
